

Task 1.1

Task 1.1	
	Loop over each character in input string
	Retrieval of surname
	Retrieval of given name
	Use of if else condition
	Return surname + given name

Task 1.2

Task 1.2	
2	2 successful test results (1m each)

Task 1.3

Task 1.3	
	Slicing of input string
	Correct weights used to calculate check digit
	Correct replacement of < with 0
	Correct calculation of value of each character
	Correct calculation of total value
	Correct calculation of check digit : total % 10
	Comparison between check digit and last character in input string
	Return Boolean

Task 1.4

Task 1.4	
1	Task 1.3 used
1	Correct slicing of string to generate and check various check digits
1	Return boolean
2	2 successful test results (1m each)

Task 2.1

Task 2.1	
	Queue class written
	Queue Constructor with correct attributes
	Is_empty method
	Is_full method
	Peek method
	Enqueue method
	Dequeue method
	Display method

Task 2.2

Task 2.2	
	CircularQueue class written
	CircularQueue Constructor with correct attributes
	Enqueue method override
	Dequeue method override
	Display method override

Task 2.3

Task 2.3	
	Creating a CircularQueue object
	Correct output of final contents

Task 3.1

Task 3.1	
	Creation of 4 tables (CREATE sql)
	Primary key of ParticipantID in RegistrationTable
	Foreign key of ParticipantID in other 3 tables
	Correct columns in RegistrationTable
	Correct columns in other 3 tables

Task 3.2

Task 3.2	
	Flask application is run
	ParticipantID is generated
	HTML form for entry of fields is implemented
	Create connection to database
	Correct insertion of data into the RegistrationTable
	Correct insertion of data into the relevant tables
	Database transaction must be committed
	Close connection
	Submit button created
	Correct results shown
	Display results in HTML table

Task 3.3

Task 3.3	
	Test button created
	Correct results shown
	Display results in a HTML table, one for CER
	Display results in a HTML table, one for ALT
	Display results in a HTML table, DFC

Task 3.4

Task 3.4	
	Select Count
	ParticipantID
	from ALT
